JCorp launches container operations at Tanjung Langsat port

Johor Corporation has launched its new container operations at Tanjung Langsat Port, Johor via its subsidiary JLand Group to further cement its role as a regional logistics hub and boost growth in southern Johor.

KUALA LUMPUR (Oct 4): Johor Corporation (JCorp), via its subsidiary JLand Group (JLG), has launched its new container operations at Tanjung Langsat Port, Johor to further cement its role as a regional logistics hub.

This launch aligns with Malaysia's Economic Transformation Programme (ETP) and aims to boost growth in southern Johor, positioning the port as a competitive gateway for regional trade.

The launch, officiated by Transport Minister Anthony Loke, marks a strategic expansion for Tanjung Langsat Port, which already handles bulk, breakbulk, and liquid cargo, including petroleum and edible oil.

The new container facilities are expected to meet rising demand and further integrate the port into the Johor-Singapore Special Economic Zone (JS-SEZ), benefitting multinational companies.

“The Tanjung Langsat Industrial Complex has attracted RM34 billion in investments and created over 15,500 jobs. In 2023 alone, Johor secured RM43.1 billion in investments, generating more than 19,000 jobs, underscoring the state's strategic advantages and industrial strength," he said.

Meanwhile, JCorp's director of real estate and infrastructure Datuk Akmal Ahmad said: “Recognising the evolving global trade dynamics, the port has made significant investments to diversify its operations and enhance its infrastructure, technology, and workforce capabilities.”

Tanjung Langsat's strategic location has attracted new investments, including a RM1 billion commitment by EcoCeres Renewable Fuels Sdn Bhd, a Hong Kong-based firm, to develop sustainable aviation fuel facilities, which are set to begin operations next year.
